

Society Cosmetic Scientists (Singapore);

Technical Talk; Tuesday 29th November 2011

Speaker; Philip Jacobs, Regional Sales & Marketing Director; B&T Company

Authors; Philip Jacobs, Alain Thibodeau, Sergio Amari

ABSTRACT; Olive Leaf Extract is a Traditional Mediterranean Medication with a history of several 1000 years of application for both medicinal and cosmetic preparations.

B&T through various studies have identified the antiradical action of Olive Leaf Extract and from these studies we will show how this ingredient can be beneficial for Anti-Acne Treatments.

The presentation will review the historic mythology and application, the extraction process used by B&T, the studies to support the efficacy claims and finally review some of the modern use of Olive Leaf extract.

PHILIP JACOBS, BIO; Philip's tertiary qualification are in mechanical engineering. In 1977 Philip joined Givaudan in Australia and relocated to Singapore in 1994 to take on a Regional Cosmetics Ingredients Management position.

He joined H&R 1997 as Regional Director for Cosmetic Ingredients based in Singapore and with the formation of Symrise was appointed as Regional President for the Sensory Ingredients Division.

In January 2007 Philip joined the B&T Company of Italy as Sales & Marketing Director for the Asia Pacific Region
